FOR ARENAS, RINKS, RECREATION CENTRES, AND ENTERTAINMENT VENUES

Every venue stocked, from concessions to cleaning.

Trakr is inventory management software for recreation facilities and entertainment venues, from arenas and rinks to recreation centres and casinos. Count concession, cleaning and maintenance supplies across venues from a phone.

Per location
minimum levels

Transfers
storeroom to stand

A TYPICAL SITUATION

An arena runs several concession stands, a janitorial closet on each level and a maintenance shop. A restock request usually means a walk to find out what is actually left.

WITH TRAKR

In Trakr each venue or stand is a location, with closets and shelves as storage areas. Staff count on their phones, a minimum per location shows what is low, and transfers move stock from the main storeroom to a stand.

WHAT TRAKR DOES HERE

- **Concessions and cleaning in one inventory**
  Keep food and beverage, janitorial and maintenance supplies in the same system, each in its own storage area.
- **Several venues, one account**
  Add a location for each venue or stand and transfer stock between them. The number of locations depends on your plan.
- **Tasks for event days**
  Create count, pick and receive tasks, assign them to a person, or let someone claim them from the app.
- **Know what to reorder**
  The reorder report lists products below their minimum. Export it as Excel or PDF.

THE FIVE PILLARS, IN RECREATION FACILITIES TERMS

Manage	Count, pick and receive on a phone, and assign tasks to staff before an event.
Visibility	See quantities per venue and storage area, the movement history of each product, and the Health Check dashboard for the location you are in.
Organize	Set up each venue or stand as a location, with closets and shelves as storage areas. Assign staff to locations and set roles.
Connect	Scan with the phone camera, print shelf labels, and post picks from your own systems through the REST API.
Replenish	Set a minimum per product at each venue or stand set up as a location, read the reorder report (narrow it to a storage area), and get low-stock emails on your schedule.
Hardware	Trakr works on any phone out of the box and plugs into Linea Pro scanners, RFID, and label printers when you need them.
