FOR KITCHENS, CAFÉS, AND FOOD SERVICE

The kitchen stays stocked through the rush.

Trakr is inventory management software for restaurants, cafés and food service teams. Count the walk-in on a phone, record deliveries as they arrive, and see what to reorder before the shelf is empty.

reorder report export

A TYPICAL SITUATION

A café counts stock on paper at the end of the week and orders from memory. The walk-in, dry storage and bar are counted by whoever has time, and the sheet is retyped later.

WITH TRAKR

In Trakr each area is a storage area. Staff count on a phone, deliveries are recorded with their invoice and PO numbers, and the reorder report lists what is below its minimum.

A TYPICAL DAY IN THE KITCHEN EXAMPLE

06:40 RECEIVING	10:15 COUNTING	10:24 REPLENISH	16:50 PICKING
Receiver	**Cook**	**Trakr**	**Line staff**
Records the produce delivery with its invoice and PO numbers	Counts the walk-in, shelf by shelf	Reorder report lists the products below their minimum	Picks a box of gloves for the dish pit

WHAT TRAKR DOES HERE

- **Counts go straight into the app**
  Count the walk-in, dry storage and bar on a phone. No lost papers, no retyping.
- **Know what to reorder**
  The reorder report lists products below their minimum. Export it as Excel or PDF for your supplier.
- **Deliveries with their paperwork**
  Record what arrived with the invoice and PO numbers, and on-hand goes up when you save.
- **More than one kitchen**
  Add a location for each site and transfer stock between them.

THE FIVE PILLARS, IN RESTAURANTS & FOOD SERVICE TERMS

Manage	Count, receive and pick on the phone your team already carries. Receipts keep the invoice and PO numbers from the delivery.
Visibility	Open the reorder report or the Health Check dashboard for the location you are in, and look up the movement history of any product.
Organize	Set up the walk-in, dry storage and bar as storage areas, each café or kitchen as a location, and move stock between them with a transfer.
Connect	Scan with the phone camera and print shelf labels. Send products and counted quantities to QuickBooks Online.
Replenish	Set a minimum for each product, see what is below it, and get a daily, weekly or monthly low-stock email.
Hardware	Trakr works on any phone out of the box and plugs into Linea Pro scanners, RFID, and label printers when you need them.
